

Port Esbjerg is seeking **SECURITY TECHNOLOGY OFFICER**

Port Esbjerg is seeking a technically-skilled and security-minded Security Technology Officer to help develop, operate, and maintain the systems that protect one of Denmark's leading commercial ports.

The Security Technology Officer will be responsible for Port Esbjerg's physical security systems and will work in the Security and Technology department as part of the security team. They will also work closely with external suppliers, emergency services, and government authorities.

The position combines security, operational technology, and safety assets. The successful candidate will have an important role in ensuring that our security systems remain reliable, effective, and aligned with the requirements of a modern critical infrastructure environment.

The role is both office-based and involves practical work throughout the port.

Among other things, you will work with:

- Gate controls and perimeter security technologies
- Visitor management and control systems
- Security drone operations
- Planning and implementation of new security technology projects
- Maintaining technical documentation, system inventories, and configuration records

Qualifications

We are looking for an independent, technically minded, and service-oriented person who is comfortable working with both technology and people. You should have a practical approach to troubleshooting and be able to work independently while also coordinating effectively with colleagues, management, authorities, and external suppliers.

In addition, the following is expected:

- Relevant education or professional experience within security technology, electronics, IT, automation, or a related technical field
- Experience with electronic security systems
- Experience troubleshooting hardware, software, and network-related issues
- Understanding of cybersecurity principles and secure system configuration
- Ability to document technical systems and communicate technical issues clearly
- Good English skills
- Knowledge of the ISPS Code
- The person must be able to be security approved

Relevant technical certifications or training within networking, cybersecurity, physical security or security technology are an advantage. A military or law enforcement background is an advantage.

You are offered:

- Opportunity to make a difference in the job
- An exciting and challenging everyday life
- Good colleagues and a good working environment
- Attractive employee benefits
- Salary according to collective agreement
- Permanent full-time position

Practical information

- Applications marked "SECURITY TECHNOLOGY OFFICER" should be sent to job@portesbjerg.dk
- Application deadline: 20 October 2026
- Interviews will be held on an ongoing basis
- Start date: To be agreed
- For further information about the position, please contact Port Risk and Safety Officer Eric Fouts directly at +45 23 31 56 48

Esbjerg Port is one of Denmark's leading commercial ports, with more than 5,000 ship calls annually. Esbjerg Port is a recognized player among both domestic and international stakeholders and continually works on developing the port and the organization.

The port hosts approximately 10,000 employees across more than 200 different companies, with around 50 people employed directly by Esbjerg Port.

The culture is informal and direct, and we are all development-oriented and curious about optimizing and improving efficiency.

We are professional in our approach to work and understand how to navigate in a company with significant attention from the business community and other stakeholders in Denmark and abroad.
